## **INDUCED ABORTION SUMMARY REPORT**

### **Purpose**

The reporting of induced abortions occurring in Idaho has been required by state statute since July 1, 1977, as provided in Section 39-261, Idaho Code. The Bureau of Vital Records and Health Statistics began collecting abortion data in July 1977, with 1978 the first full year for which abortion statistics are available. This summary report contains data regarding abortions occurring in Idaho and data regarding abortions to Idaho residents for the years 1996 - 2006.

## **INDUCED ABORTIONS OCCURRING IN IDAHO 1996-2006**

### **Definition**

Induced abortions occurring in Idaho include all reported abortion procedures occurring in Idaho, regardless of the patient's state of residence.

### **Limitations**

Due to revisions in the database, data may differ slightly from those previously published by the Bureau of Vital Records and Health Statistics. The reader is cautioned that the database contains small numbers; therefore, percents, rates, and trends tend to randomly fluctuate.

### **Summary**

From 1996 to 2006, the number of induced abortions occurring in Idaho increased 22.2 percent from 1,022 in 1996 to 1,249 in 2006. In 2006, 97.5 percent of abortions occurred in Ada County and 2.5 percent occurred in Bannock County.

The number of abortions occurring to Idaho residents in Idaho increased 26.3 percent from 962 in 1996 to 1,215 in 2006. At the same time, the number of abortions occurring to out-of-state residents in Idaho decreased 43.3 percent. Of the 1,022 abortions occurring in Idaho in 1996, 60 (5.9 percent) were to out-of-state residents compared with 34 out of 1,249 (2.7 percent) in 2006.

## **INDUCED ABORTIONS OCCURRING IN IDAHO 2006**

The number of induced abortions occurring in Idaho increased 13.6 percent in 2006, from 1,099 in 2005 to 1,249 in 2006. The number of abortions occurring in Ada County increased 19.6 percent in 2006, from 1,018 in 2005 to 1,218 in 2006.

### **Age:**

From 2005 to 2006, the number of abortions increased in each age group, except for the 45 and older age group, which had one fewer abortion than in 2005. The number of abortions in the 15-17 year old age group increased 54.8 percent (40 abortions). The number of abortions to women in the age group 20 to 24 accounted for 31.9 percent of all abortions in 2006.

### **Residency Status:**

The number of abortions occurring in Idaho to Idaho residents increased 14.1 percent in 2006, from 1,065 in 2005 to 1,215 in 2006. The number of abortions occurring to non-Idaho residents remained the same in 2006 at 34.

### **Marital Status:**

The number of abortions occurring to married women increased 16.9 percent in 2006, from 219 in 2005 to 256 in 2006. The number of abortions occurring to unmarried women increased 13.1 percent in 2006, from 878 in 2005 to 993 in 2006.

### **Race:**

The number of abortions occurring to whites increased 11.3 percent in 2006, from 1,018 in 2005 to 1,133 in 2006. The number of abortions occurring to American Indians increased 31.6 percent in 2006, from 19 in 2005 to 25 in 2006.

### **Ethnicity:**

The number of abortions occurring to Hispanics increased 2.3 percent in 2006, from 133 in 2005 to 136 in 2006. The number of abortions occurring to non-Hispanics increased 15.1 percent in 2006, from 959 in 2005 to 1,104 in 2006.

2000	745	20	36	801
2001	665	30	43	738
2002	797	9	23	829
2003	867	-	44	911
2004	933	-	30	963
2005	1,072	1	26	1,099
2006	1,239	1	9	1,249

Note: prior to July 1, 2006, any educational material may have been provided to patient. Starting July 1, 2006, educational materials from the Idaho Department of Health and Welfare must be provided to patient by law. Of the nine records with unknown status for patient education materials provided in 2006, 7 procedures occurred prior to July 1, 2006 and 2 occurred on or after July 1, 2006. The one procedure in 2006 in which patient educational materials were not provided occurred prior to July 1, 2006. It is possible to have reports of procedures with unknown or no patient educational materials provided in rare cases of medical emergencies.

## **INDUCED ABORTIONS TO IDAHO RESIDENTS 1996-2006**

### **Definition**

Induced abortions to Idaho residents include:

- 1) The number of reported abortions occurring in Idaho to Idaho residents; and,
- 2) The number of reported abortions occurring in other states to Idaho residents.

### **Limitations**

In 1984, an interstate data exchange program for abortion data was initiated nationwide, whereby Idaho can obtain non-identifying information about abortions occurring to Idaho residents in other states. However, not all states have regularly provided the Bureau of Vital Records and Health Statistics with non-identifying, detailed reports on abortions obtained by Idaho residents. From 1989-2001, with the exception of 1991 and 1998, reports were not forwarded from Montana for Idaho residents who obtained abortions in Montana. In 2003, Montana forwarded reports for the missing years and they were added to our databases. Those reports are included in the data published in this report and in any data published after August 2003. The total number of abortions occurring to Idaho residents may differ from the vital statistics annual reports due to late reporting by Montana and revisions to the database.

In cases where the state of residence is reported without a city or county specified and the resident state is different from the state of occurrence, the abortion record is allocated to the largest city of the state of residence. In Idaho, the largest city is Boise in Ada County and in 2006, there were three out-of-state records allocated to Ada County.

The reader is cautioned that the database contains small numbers; therefore, percents, rates, and trends tend to randomly fluctuate.

### **Summary**

From 1996 to 2006, the number of abortions to Idaho residents ranged from a low of 1,473 in 2001 to a high of 1,919 in 2006. In all but one year, 2001, the majority of abortions to Idaho residents occurred in Idaho. From 1996 to 2006, most abortions to Idaho residents which occurred out of state occurred in Washington. Of the 704 abortions to Idaho residents which occurred out of state in 2006, 528 (75.0 percent) occurred in Washington.

Overall, the number of abortions to Idaho residents increased by 113 (6.3 percent) from 1996 to 2006. At the same time, there was an increase in the population for females aged 15-44, which resulted in an overall decrease in the abortion rate. The abortion rate per 1,000 females aged 15-44 decreased 7.2 percent from 6.9 in 1996 to 6.4 per 1,000 females in 2006. Similarly, the abortion ratio per 1,000 live births declined 18.5 percent from 97.3 per 1,000 live births in 1996 to 79.3 in 2006.

## **INDUCED ABORTIONS TO IDAHO RESIDENTS 2006**

The number of induced abortions occurring to Idaho residents increased 5.0 percent in 2006, from 1,827 in 2005 to 1,919 in 2006. From 2005 to 2006, the number of abortions increased to residents in District 3 and 4, and decreased in the remaining districts.

### **In Idaho:**

The number of induced abortions occurring to Idaho residents in Idaho increased 14.1 percent in 2006, from 1,065 in 2005 to 1,215 in 2006. The majority of this increase occurred to residents of Ada County. There were 76 (11.6 percent) more abortions to Ada County residents in Idaho in 2006 than in 2005.

From 2005 to 2006, the number of abortions increased in the 10-14, 15-17, 20-24, 25-29, and the 30-34 age group. It decreased in the 18-19, 35-39, 40-44, and the 45 and older category. The number of abortions in the 25-29 year old age group increased 9.2 percent (53 abortions).

### **Out-of-State:**

The number of induced abortions occurring to Idaho residents out-of-state decreased 7.6 percent in 2006, from 762 in 2005 to 704 in 2006. The majority of this decrease occurred to residents of Kootenai County. There were 37 (11.8 percent) fewer abortions to Kootenai County residents out-of-state in 2006 than in 2005.

Rate: Number of induced abortions to women of all ages per 1,000 females 15-44 years of age. Refer to Table 11 on page 21 for population source.

Dash (-) represents zero.

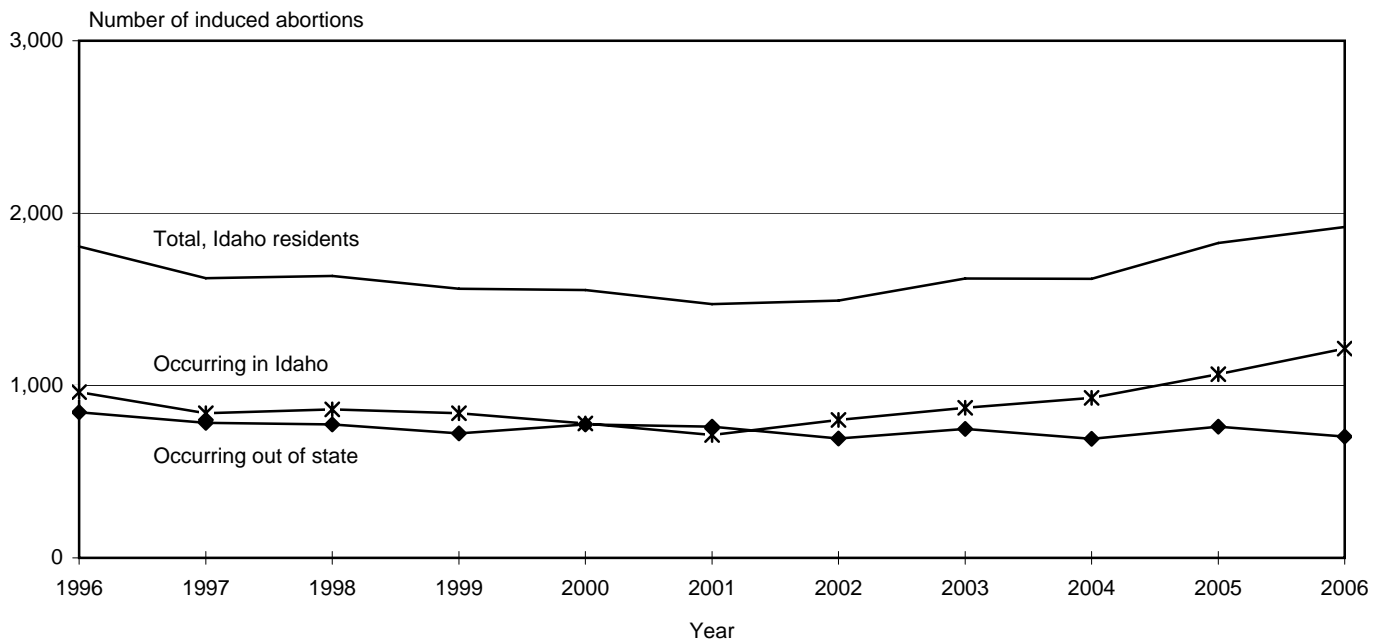

Due to revisions in the database, data may differ slightly from those previously published by the Bureau of Vital Records and Health Statistics.

1. Total abortion rate: Number of induced abortions to women of all ages per 1,000 females 15-44 years of age. Abortion rates for 1996-1999 are based on population estimates from the U.S. Census Bureau, Internet release August 30, 2000. Rates for 2000 are based on April 1, 2000 Census data, Internet release August 1, 2001. Rates for 2001-2002 are based on the National Center for Health Statistics, estimates of the July 1, 2001-July 1, 2002, United States resident population from the Vintage 2002 postcensal series, prepared under a collaborative arrangement with the U.S. Census Bureau, Internet release date August 8, 2003. Rates for 2003, 2004, 2005, and 2006 are based on July 1, 2003, July 1, 2004, July 1, 2005, and July 1, 2006 population estimates from the U.S. Census Bureau and National Center for Health Statistics, Internet release dates August 18, 2004, September 9, 2005, August 16, 2006, and August 16, 2007, respectively.

2. Total abortion ratio: Number of induced abortions per 1,000 live births.

Due to revisions in the database, data may differ slightly from those previously published by the Bureau of Vital Records and Health Statistics.

Dash (-) represents zero or a rate that rounds to less than 0.1.

NA - not applicable.
